Subject: West Fertilizer Fire and Response--- call to TCEQ Director Linda Brookin
Date: Thursday, April 18, 2013 10:15:35 AM

Sam and Bill,

I talked with Linda Brookin, Director of DW, at 8:30 am this morning. She indicated that as of the moment, she didn't need DW assistance. They are working with their Homeland Security personnel and are currently working on identification and contacting the operators of DW facilities within a 45 mile radius of West. Her understanding is that West buys their water from City of Waco. There is one GW well storage facility near West, but they are looking at maps to get more location information. TXWAN has also been activated.

She indicated if they need DW staff assistance, she will call me on my blackberry.

Let me know if you need anything.

Stacey
